

Why French Kids Don't Have ADHD

French children don't need medications to control their behavior.

Published on March 8, 2012 by Marilyn Wedge, Ph.D. in Suffer the Children

In the United States, at least 9% of school-aged children have been diagnosed with ADHD, and are taking pharmaceutical medications. In France, the percentage of kids diagnosed and medicated for ADHD is less than 0.5%. How come the epidemic of ADHD—which has become firmly established in the United States—has almost completely passed over children in France?
